DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 15, 16, 18, 22 and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Otto (5,365,218).

Regarding to claimed invention (claims 1 and 22), Otto discloses laser monitoring device consisting of a laser transmitter and receiver for determining angular position by means of length adjustable device 11a, so that the areas swept by the laser can be varied in terms of distance from property 22, see col.2, lines 28-32. Otto also discloses the adjustable laser power in energy and intensity see col. 2, lines 36-39.

Regarding claim 16, Otto disclose automatically amplifying laser power for operating in a safer range as a function of laser beam direction, see col. 3, lines 6-15 and 22-26.

Regarding claims 18 and 25, Otto discloses variable power lasers with different scanning speed see col. 3, lines 23-28.

Allowable Subject Matter

2. Claims 17, 19-20, 21, 23-24, 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The cited art does not teach subdividing scanning area into segments with each having different detection relevance, and having different scanning speed.
